(54) Title: DEVICE TO ENERGIZE WATER

(57) Abstract: The present summary mentions a patent to it of model of utility for device to energize water, pertaining to the field of the half ones for water treatment, that received disposal to execute something simple, efficient and with long useful and understood life: for silo with closing it stanches (1), that entirely it is divided inside of the water to be treated and formed by metallic stowage and/or material plastic (2); for rubber base and/or metallic (3), in which is mounted the stowage (2) and adjusted to be supported in foot in the deep one of a reservoir contending the water and/or handle (6) to inside hang the device dived and suspended on the water; said device it is formed still by a load of magnets, made use in a way to interacting and to create magnetic flows (4), lodged inside of the selected silo and so that its magnetism acts from the central region of the water mass.
